Subject: GenX Prelim DW Estimates

Hi David,

Attaching a spreadsheet with preliminary DW estimates using our equations from EFAST manual and levels reported in Sun et al. 2016. Can you please review my work?

Ex. 5 - Deliberative Process

Ex. 5 - Deliberative Process

I applied the DW scaling factors that Charles developed to get to other age groups, which are shown below. The highest is of course the infant <1 yr.

Thanks,

Stephanie
